Natural Avalanches Alex Lowe

Date
Sat, 03/09/2024 - 13:25
Activity
Snowboarding

From the ridge between Blackmore and Elephant we saw multiple natural large slab avalanches in the upper South Cotttonwood drainage. More natural avalanches not shown, mostly on northerly aspects. Appeared fairly recent and deep. Decided against skiing Alex Lowe and opted for good turns on Blackmore. Warm with moderate/strong southwest winds, minor transport.

Region
Northern Gallatin
Location (from list)
Alex Lowe Peak
Observer Name
Logan Gabrielson
