

Snowpack Summary

Submitted by Eric Knoff on Thu, 04/19/2018 - 12:49

Winter's first major snowstorm impacted the region in mid-September, coating the mountains around Bozeman with multiple feet of snow. Brackett Creek Snotel site in the Bridger Range received 6.1" of SWE from the 16th to 24th of September. Long time locals called it the best September skiing on record. The mountains around Big Sky, West Yellowstone and Cooke City also picked up significant early season snow. The snowpack at primary SNOTEL sites in our advisory contained the highest amount of [snow water equivalent](#) on record for each day from September 20th-26th.
