W

Latitude

45.33520

Longitude

-111.38400

Notes

From e-mail: " in bhive today, as I rolled into a W facing gully at around 9800ft I got a good whumph, I noticed a 25ft wide crack probably about 8 inches deep, it did not run just fractured. I checked it out seemed like it broke on an older [slab](#) sitting on that facet layer from early December."
