Big Avalanches on west side of Bridgers

Truman Gulch Bridger Range 1/24/2019 Code SS-N-R4-D3-I Elevation 8000 Aspect NW Aspect Range NW, W, SW

Latitude

45.80590

Longitude

-110.93600

Notes

From the ridge late this morning (1/24) we saw multiple large crowns in Truman Gulch on the west side behind Bridger Bowl. Biggest was behind d-route (photo).

Two other slides visible today during brief break before more snow. One behind ridge north R2-D2, and one behind the patrol tow R3-D2.5. All 2-3.5' deep, latter two not as wide. All big. Broke naturally, probably overnight after 1.6" of swe yesterday and moderate westerly winds. Photo: GNFAC
