Elevation  
7400  
Aspect  
W  
Latitude  
45.46630  
Longitude  
-110.98400  
Notes

Skiers in Hyalite saw a natural wet [slab](#) near Blackmore Lake. From the email: "The [slide](#) was located around 300 yards South of Blackmore Lake on a West facing slope at an elevation just above 7400 feet. It broke below a cliff band about 3' deep (to the ground) and ran a few hundred feet (almost to the skin [track](#))." Photo: JR Mooney
