

Natural Avalanche in Pinnacles, Bridger Range

Saddle Peak

Bridger Range

2/4/2020

Code

SS-N

Aspect

E

Latitude

45.79430

Longitude

-110.93600

Notes

"I took this photo from the highway today just before noon 2/4/20. Looked pretty fresh and not blown in much and the winds were howling. Largest part of the crown looked 6-8' tall right in the center. It connected across a pretty low angle shoulder to pull out the northern bowl."
