Notes

A snowmobiler triggered a [slide](#) in ..." Upper Teepee basin where skyline ridge meets up with I believe Bacon Rind at the Lee Metcalf area and set off a decent avalanche. Luckily the snowmobiler was able to get out of the path of the avalanche and nobody was involved. It looked like the crown was 3-4 ft in spots on a heavily wind loaded slope. Also there was old avalanche debris just to the south of this spot on same [aspect](#) of slope."
