

Unstable test results South of cooke city

Date

Wed, 02/09/2022 - 14:00

Activity

Skiing

I was touring on the west side of Wyoming creek today. Got some large whoomfs and collapses on the Ridgeline and a poor test score of ectp11 q1 sp 22cm deep on on buried surface hoar on top of facets on an E/SE facing slope at 9242' hs-163cm, slope angle 26° The same layer was easily identifiable in hand shears throughout the day.

Region

Cooke City
