Notes

From IG: "Avalanche in the crazies that caught and carried me today. There were quite a few cars at the trailhead so I thought I'd share so maybe more people knew what the crazies snowpack is like.

Hard [wind slab](#) on a NE [aspect](#) at 8000ft. The whole seam was about 300feet wide and the toe was maybe 100 feet below the crown at the furthest. Collapsed on buried [surface hoar](#) on top of a freeze crust."
