

skiing in Republic Creek

Date

Mon, 01/08/2024 - 13:25

Activity

Skiing

Accessed Woody Ridge from Republic Creek, approximately 3 mi up. Turned around on a west slope at 9000', due to time of day. 8 degrees air temp,

Snowpack skied well and was supportable - 6-8" of new that seemed well bonded to old snow. 2 perceptible layers when probing with a ski pole. Lower layer much harder.

Downfall is still a hazard - not completely buried, but skiing was remarkably good, considering.

Mostly overcast day. Occasional wind gusts out of the SW, but mostly calm and cold.

Region

Cooke City

Location (from list)

Woody Ridge
