

Weak layers in Tele Meadows

Date

Mon, 01/15/2024 - 13:59

Activity

Skiing

ECT failed at 9 at most recent layer of facets, 50cm above ground level, 15cm thick, approaching ball bearing consistency.

East facing slope, 7848'

Total snow depth 75 cm

Hard slab between 35-50cm, second facet layer at 25cm, consolidated to ground, couldn't get either the middle slab or lower facet layers to fail.

Some cracking while we skied out.

Region

Southern Madison

Location (from list)

Telemark Meadows

Observer Name

Lauren Burgess
