

Fractured slope in hyalite

Date

Wed, 02/07/2024 - 14:20

Activity

Skiing

Skied a northeast face that was around 35-40 degrees at around 9000 ft. Entire slope fractured on second ski cut but did not slide. A dusting of new snow, with a good bit of powder on the ground.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Jay Alford
