

Whumpfs in Flanders

Date

Sun, 02/11/2024 - 17:40

Activity

Skiing

Skied the whitebark glade on Flanders and got several whumpfs at the mid and upper elevations. Light overnight and continued wind loading. There was a recent avalanche that appeared to be a wind slab with decent propagation on a north facing rocky slope. Visibility was too poor to get a good look or photo.

Region

Northern Gallatin

Location (from list)

Flanders Creek

Observer Name

Florence Miller
