

Large avalanche in Lionhead_likely burial/caught

Lionhead Ridge
Lionhead Range
3/1/2024
Code
SS-R3-D2-O
Aspect
E
Latitude
44.71450
Longitude
-111.31800
Notes

From a phone call:

A rider saw a large avalanche in one of the bowls around the corner of Lionhead avalanched. It likely occurred on Friday, March 1. There were holes dug in the snow indicating a buried person or sled. This is the same slope that killed a 19 year old from MN on December 28, 2006. They conducted a beacon search on the debris to make sure no one was buried.

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
R size
3
D size
2
Bed Surface
O - Old snow
Problem Type
Persistent Weak Layer
