

Avalanches above 212

Date

Sun, 03/03/2024 - 16:20

From email: "Two big avalanches observed above the “plug” east of Cooke city. on my ride over this AM. One ran to the road, unclear if it went over it and maybe the groomer ran over the debris. Appear natural or possibly snowmo triggered? "

Region

Out of Advisory Area

Observer Name

Nick Stayner
