Arden Peak slide

Date Sun, 03/03/2024 - 16:25 Activity Skiing

Shot from the top of Flanders, ~1400 this afternoon, 3/3/2024. Big slide(s) on Arden and in Maid of the Mist.

Looks like the skin <u>track</u> and ski <u>track</u> between the two slides got taken out. At first glance from across the way it looked like the skin <u>track</u> was crossing over the debris, but when zoomed in it looks like the debris overran the skin <u>track</u> and the ski <u>track</u>.

Region Northern Gallatin Location (from list) Maid of the Mist Observer Name Matt Zia
