

Cracking in Frazier Basin

Frazier Basin

Bridger Range

3/26/2024

Code

Latitude

45.92330

Longitude

-110.98000

Notes

From obs: "Skied into Frazier basin today. Triggered a few small windslabs and saw a lot of cracking on NW aspects. All windslabs were still small breaking a few inches deep 10-15 feet wide and only running short distances in steep terrain. Winds were strong from the NE all morning and still blowing hard and continuing to load slopes when we left at 12:30. "
